

MRO ExcellenceTM Is for the Customer

Did you know that a poorly managed Maintenance or MRO storeroom can cause up to a 25% loss in productivity? Did you know that 25% of your unplanned downtime could be caused by an inefficient and ineffective storeroom? Well, it is true. Now that you know it, what are you going to do about it?

This is a tough question and there are no easy answers. But there is an answer, MRO ExcellenceTM

MRO ExcellenceTM explains how your business is affected by a poorly operated storeroom and how to use this information to justify improvements in the management of the storeroom. By using a structured approach, the transition can begin.

- Set up a project team and define success.
- Determine ROI or IRR
- Set up a timeline with detailed tasks and metrics to track progress.
- Set expectations and roles for the different functions represented on the team.
- Develop an understanding of the seven types of waste causing the lost productivity.
- Develop current work flows and determine improvements which can be made.
- Ensure Standard Work Practices are developed and employed for all roles.
- Implement a planning and scheduling process
- Data Cleanse part information and review stocking decisions
- Reorganize the storeroom to increase productivity

This process works for all plants independent of the products which are being produced or the size of the facility.

MET DEMAND offers a 3-day training course on MRO ExcellenceTM. **MET DEMAND** can provide solutions for your organization through consulting and coaching on how to move the maintenance storeroom from being a productivity trap to being a contributor by meeting the demand of your customers and consumers. The course has lecture format with specific case studies so your workforce will have the applied knowledge to improve storeroom performance.

MET DEMAND, in association with this training, offers a 1-day MRO ExcellenceTM Assessment so your workforce can identify the gaps between their current storeroom performance and world class performance.

If you are facing productivity losses due to issues in your maintenance or MRO storeroom and would like more information on how to achieve MRO ExcellenceTM, please contact us at 1-888-427-4330 or through our website www.metdemand.com.
